

Laser Diode Beam Expanding System

- ▶ 크기가 크고 가변적인 sample (cell culture plate)에 빔을 조사하기 위해 고안된 광학시스템
- ▶ Light source : 660nm diode laser
- ▶ Output beam size : 6~15mm (가변형)

Magnification :
X2.5 (for 6mm beam)

Magnification :
X6.5 (for 15mm beam)
